# SAVANT SHADES

DESIGN BY J GEIGER

SAVANT · J GEIGER

www.savant.com/shades

BEAUTIFUL, MINIMAL, UNPARALLELED

Savant Shades combine modern architectural aesthetics, performance fabrics and unmatched control interface options to complement any luxury space.

With Savant Shades you never have to compromise on design, no matter what stage your home is in – new construction to retrofit. Shades can be shipped assembled and ready to install, or provided in custom, bespoke configurations, all with the same minimalist look.

SAVANT

PERSONALIZED PRIVACY AND NATURAL LIGHT

Use Savant control to open or close shades across multiple rooms, a single room, or even a single shade. Schedule shades to open at a specific time of day or based on sunrise and sunset. Create a morning scene that automatically opens the shades, slowly raises the lights, adjusts temperature to a comfortable level and turns on your favorite morning show.

Controlling natural and artificial lighting in perfect harmony has never been easier.
SHADES ON EVERY INTERFACE

Savant provides multiple options to make your shades easy to control. Simply use your mobile device, a touch screen remote, in-wall keypads, touchscreens, or your voice to set them just the way you want.

TRANSLUCENT   Greater levels for privacy while still allowing sunlight.

BLACKOUT   Provides total light blockage and privacy.

SHEER   Diffuses light even when the shades are closed.

FABRICS FOR EVERY FINISH

Savant has teamed up with industry-leading brands to provide you with hundreds of fabric choices to meet your shading needs. Choose from a wide variety of standard, deluxe or premier options. Savant also offers quick-ship options on select fabrics.

FLEXIBLE OPTIONS

CHOOSE PRE-ASSEMBLED, QUICK INSTALLATION

Savant Inception Series Shades arrive pre-assembled and ready to install right out of the box.

OR COMPLETELY CUSTOMIZABLE FOR BESPOKE ON-SITE CONSTRUCTION

Savant Shades may be custom tailored to the exacting requirements of each environment.

SAVANT INCEPTION SERIES SHADES

Beautiful results with easy installation, Savant Inception Shades by J Geiger feature sleek aluminum hardware, versatile automation options—motorized and manual—and a minimalist profile without visible wires or screws. Installation is quick, easy, and unlike anything else on the market today—saving time and money without compromising functionality or style.

SAVANT CUSTOM SERIES SHADES

Savant is proud to offer the design-forward, facia free style pioneered by J Geiger Shading. This stylish hardware is designed to be seen. Unsightly wires and screws are concealed within the system, eliminating the need for custom-built valances or unsightly facia.

Both battery powered, wired and manual shades use the same beautiful hardware providing a consistent look for new construction or retrofit projects.

NEGATIVE REVEAL POCKET SYSTEM

Savant's Negative Reveal Pocket System installs into an existing ceiling pocket and allows for a consistent, clean look and stays that way even when joining different types of materials. Corner molds available for a uniform corner look.

Savant's negative reveal pocketing system is available in 4" and 6" widths and includes basic bracket set.

WIRED INSTALLATION ACCESSORIES

POWER

Savant's unique, configurable in-wall power supply allows for a clean, professional installation for jobs of any size. Savant's modular power supply easily scales to power from 5 to 15 shades. For added flexibility Savant also offers a single shade power supply.
CONTROL & CONFIGURATION

Wired Motor Controllers provide digital two-way communication between wired motors and the Savant System. Savant has fully integrated the controllers and motors into Blueprint making setup a breeze. Use Blueprint to individually set shade motor speed, "wink" motors for identification, set limits, and create groups.

MOTORS

Savant offers J Geiger's exclusive wired, quiet motors to maximize occupant comfort. Motors report shade position to ensure shades stop in alignment every time.

WIRELESS INSTALLATION ACCESSORIES

POWER & MOTORS

Battery powered motors require no electrical wiring, no external battery pack and no complicated installation. Rechargeable from wall charger similar to your mobile phone.

CONTROL & CONFIGURATION

Automate Pulse Controllers provide wireless two-way communication between Automate battery-powered shade motors and Savant's SmartControl RS485 Shade Controllers.
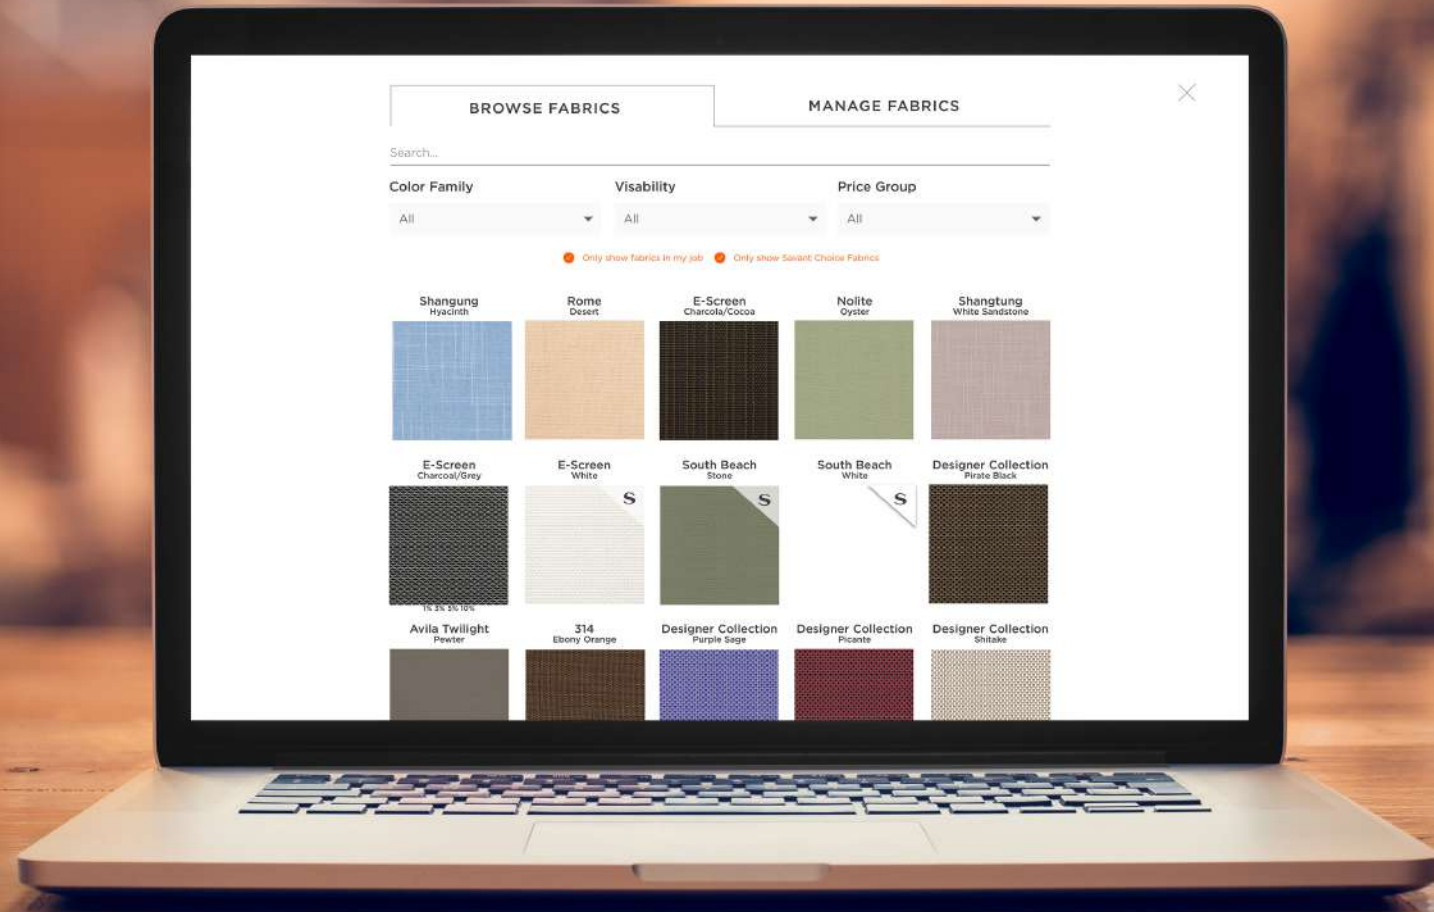

ORDERING MADE SIMPLE
SHADE DESIGN TOOL

STEP ONE:
Log in to Savant Store and the Create a new Project in the Shade Designer. Enter room names and window measurements to get started.

STEP TWO:
Select a fabric option for the entire project or one window at a time. Savant's Fabric Library can be filtered by price, color family, and visibility.

STEP THREE:
Use the Project Summary as both a quoting and ordering tools. Items can be added to a cart individually or by installation phase – order all rough-in material at the same time. The project summary will recommend shared equipment quantities that can be adjusted based on what you already have in stock.
